New Build for CAESAR II 5.20

New build for CAESAR II 5.20 is now available. Main changes of this build are:

- Corrections to code computations for ISO-14692, TD/12, B31.8 VIII
- Additional enhancements to the graphics
- The Stoomwezen approval certificate for CAESAR II 5.20
- Modifications to the MS Word export function

CAESAR II 5.20 Feature Overview - For a quick overview of the new features of CAESAR II 5.20 version, you can navigate to "\Help\What's New in 5.20". This will open a PDF file that lists most relevant changes made to the software for this version.

Main PV Elite 2010 Release Enhancements

Analysis Highlights:

- ASME Sec. VIII Div. 1 and Div. 2 code updates for '09 addenda
- The WRC Bulletin 297 added to the local analysis options
- The U-Tube tubesheets per EN-13445 analysis added

Productivity Highlights:

- Improved compatibility with Windows 7
- Modeling & analysis of the ear and perpendicular lifting lugs
- MDMT enhancements

CodeCalc	2010	100101	January 1, 2010
PV Elite	2010	100101	January 1, 2010
TANK	3.2	090923	September 23, 2009

Autodesk introduce Simplified Upgrade Pricing Begins March 16, 2010

Autodesk is introducing a new, streamlined upgrade pricing model on March 16, 2010. Under our current upgrade pricing model, the price of your upgrade depends on which product release you own. After March 15, 2010, your upgrade from any of the three previous software releases will cost 50 percent of the price of a new license, no matter which release you own. Each new release of our software is designed to help you work smarter and faster. That's why we always encourage our customers to upgrade. The best way to get current and stay current is to upgrade your Autodesk® 2007, 2008, and 2009 software with Autodesk® Subscription before March 16, 2010.

Download Your Autodesk® Subscription Advantage Packs Now

Autodesk® Subscription Advantage Packs deliver new features, specialised functionality and content that are compatible with your 2010 software. Now available – for Subscription customers only.

Windows 7 Support for Autodesk Manufacturing Products

The Autodesk Manufacturing products listed below have been tested and are confirmed as working correctly on Microsoft Windows 7 <http://www.microsoft.com/windows/windows-7/?icid=win7van>. Product Support will provide its best effort to assist customers with issues with products that have not been tested.

- Autodesk Inventor 2010
- Autodesk Inventor LT 2010
- AutoCAD Electrical 2010
- Autodesk Inventor 2010
- AutoCAD Mechanical 2010
- Autodesk Algor Simulation 2010
- Autodesk Vault 2010 (Client Only)*
- Autodesk Vault Workgroup 2010 (Client Only)*
- Autodesk Vault Collaboration 2010 (Client Only)*
- Autodesk Vault Manufacturing 2010 (Client Only)*
- Autodesk Productstream Professional 2010 (Client Only)*

PIPENET VISION 1.40 is now available!

The new version of PIPENET VISION Software Modules including Spray/Sprinkler, Transient and Standard Modules will be provided to customers with valid annual subscription on Maintenance, Upgrades and Support (M,U&S). Click here to find out more about the new list of features.

HTRI Exchanger Suite 6 - Service Pack 1 now available!

Members can now download Service Pack 1 for HTRI Xchanger Suite 6. This service pack features several important updates, including

-  Weight fraction vapor profile for alternate physical properties package
-  Continuous fin method corrections
-  Variable incremental tube lengths in tubeside calculations
-  Modified criteria for condensate flooding message
-  Report export to Microsoft® Excel 2007

HTRI alliance with Honeywell to result in New Products and Services

In early 2010, Honeywell's UniSim® heat exchanger software will be available for licensing directly from HTRI, providing companies around the world with a single source for both the industry leading HTRI *Xchanger Suite*® and Honeywell's heat exchanger modules. Additionally, Honeywell is providing related technology to aid in the development of future products and services.

This alliance is a very positive development for HTRI and its members. With access to independently conducted research and software development dating back to 1971, we will be able to refine our existing efforts, accelerate development of new research areas, and provide members with more software options.

Among these options is a translation tool that will allow *Xchanger Suite* to open and convert cases from Honeywell's UniSim heat exchanger modules as well as other thermal software products. This valuable tool builds on Honeywell's case portability with process simulation products from Aspen Technology. The translation tool is in development and will be available to HTRI members in the first quarter of 2010.

HTRI and Honeywell also will work together to create a closer integration between *Xchanger Suite* and Honeywell's UniSim® Design process simulator. This collaboration will provide best-in-class thermal simulation options to process designers and manufacturers.
