The right tools to speed work

Access industry-specific features that help you be more efficient than ever before. Recent studies showed an average productivity gain of up to 63% for AutoCAD tasks completed with the help of a specialized toolset.**

- Access libraries of over 750,000 symbols, parts, and detail components.
- Automate the creation of annotations, layers, and properties.
- Easily create details and views from 3D models, and quickly generate schedules, lists, and tables.

Architecture toolset

Speed up architectural drawing and documentation with over 8,000 intelligent architectural objects. Automate floorplans, sections, elevations, and more.

Mechanical toolset

Accelerate product design with mechanical design features and over 700,000 intelligent manufacturing parts and symbols. Experience simplified layer management, generation of parts list, and creating bills of materials (BOMs).

Electrical toolset

Boost productivity while documenting electrical controls systems with over 65,000 intelligent electrical symbols. Design panel layouts and schematic diagrams. Supports AS, GB, IEC, IEC-60617, JIC, JIS, NFPA, and IEEE standards.

MEP toolset

Get new features and enhancements

Trace

Enhance collaboration and streamline the review process. Safely review and provide feedback on a drawing in AutoCAD without altering the existing drawing. Works across desktop, web, and mobile.

Share

Send controlled copies of your drawings to your team and colleagues, establishing access for those who need only to view and those who need to edit. Save time sharing your drawings with AutoCAD.

Count

Automate counting tasks and reduce errors. Counting can be done by layer, mirror state, or scale. Counts easily update and can be exported into a dynamic table.

Push to Autodesk Docs

Improve productivity and reduce steps by publishing your CAD drawing sheets as PDFs from AutoCAD to Autodesk Docs. Plus, you can access your DWG files in Autodesk Docs anywhere with the AutoCAD web app.

“Count will save an immense amount of time by eliminating the block counting exercises within the drawing while removing human errors. It’s a huge win.”

- Chad, Corporate CAD Coordinator

Floating windows

View and edit two drawings at the same time in fully functional windows side by side, or on multiple monitors. No need to open another instance of AutoCAD.

Redesigned Start Tab

The new AutoCAD start tab allows you to easily access files and other helpful content all in one place.

Customizable installation

Reduce the amount of time setting up your software with faster and customizable installations. You can even work in AutoCAD while it’s being installed.

Performance enhancements

Experience faster performance including when plotting and for 3D graphics.

Protect your designs with TrustedDWG technology

Help retain the integrity of your design data throughout the review process with TrustedDWG™ technology. Built into AutoCAD software, TrustedDWG is the original, most efficient, and most accurate way to store and share design data.
