

Manage design projects with smarter tools at your fingertips.

BIM Collaborate offers powerful visibility and coordination on AEC projects so you can deliver high-quality, constructable models for faster project delivery.

Anytime, anywhere visibility

Made for project reviewers, Autodesk® BIM Collaborate provides visibility into ongoing design work in Civil 3D, Revit, and AutoCAD Plant 3D without having to access the tools.

Stay on top of project changes

Run clash detection, manage team collaboration, track issues to resolution, and realize better outcomes with project controls and advanced analytics.

Powerful data management

Centralize, organize, and structure design data management on a secure common data environment to reduce silos and keep teams on the same page.

Stay informed on design progress with BIM Collaborate

Insights

Take advantage of your design data to highlight and mitigate risks and make better data-driven decisions, faster.

Document management

Change analysis

Clash detection

Issue resolution

Design review

AUTODESK® DOCS

Store and manage all project documents and data from design through construction in a Common Data Environment. Includes access to both BIM 360 projects and Autodesk® Construction Cloud projects.

Review designs, manage collaboration, and coordinate designs in one platform

Democratized access to design data

Easily review designs in a web browser, identifying and assigning issues on designs for fast resolution without opening Revit, Civil 3D, or Plant 3D. Extensive file support, covering over 50 file types, including MS Office 365, RVT, C3D, DWG, IFC, and other Autodesk file types.

Valuable project insights

Track common issues throughout the design co-creation process, using the power of your own project data to improve planning and predictability.

ISO 19650 support

Access workflows that support ISO 19650, a global design and construction information management standard.

Robust access controls

Administer teams, projects, and accounts in one place. Secure access to relevant data with automated control to keep teams focused.

Advanced change analytics

Understand how changes across disciplines affect planned work by viewing any combination of models in 2D or 3D view

Data center choice

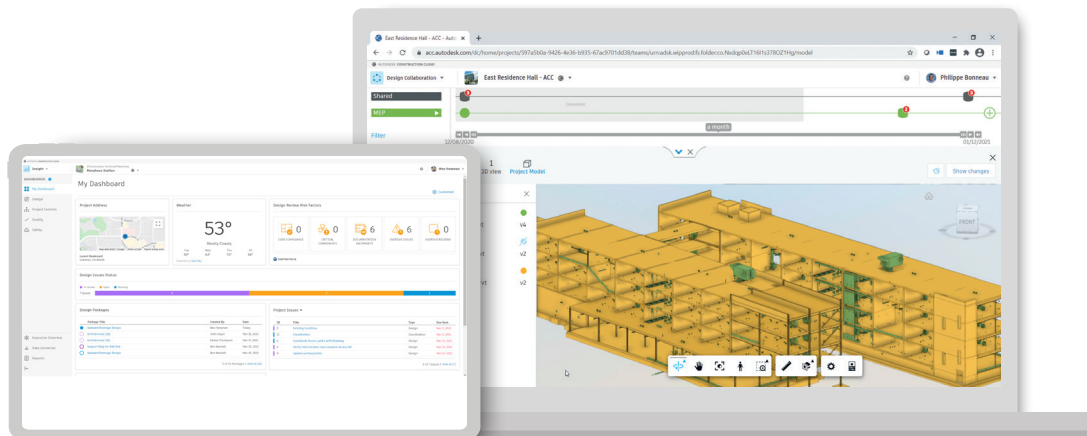

Choose to host your project data in Europe or the United States

Overarching project timeline

Easily see dates and contents of shared design packages, managing data exchange on multidiscipline projects.

Automated Clash Detection

Upload models to automatically detect clashes. View results in an intuitive matrix, identifying clashes and grouping them to prioritize work.

“

We've been on the lookout for a solution that connects data, tools and project analytics in one place and helps reviewers who don't use Revit get access to a full view of the Revit model, so we are thrilled about the launch of Autodesk BIM Collaborate and the added value in BIM Collaborate Pro.”
